

A line graph showing a highly volatile time series. The plot features a single black line that fluctuates significantly across the horizontal axis, with several sharp peaks and deep troughs, indicating high variability in the data.

The graph displays a single data series characterized by extreme fluctuations. It begins with a moderate peak, followed by a sharp decline to a deep trough. This is followed by a series of smaller peaks and troughs, with the highest peak occurring towards the middle of the series. The overall trend is highly irregular, suggesting a process with significant noise or volatility.
